

## António A. Correia

Dr. António A. Correia is a Senior Researcher and Head of the Earthquake Engineering and Structural Dynamics Unit of LNEC. He is an expert on earthquake engineering and seismic risk, with over 20 years of experience on the development of seismic risk and structural vulnerability studies, either at urban level or for critical infrastructures, as well as working on structural and geotechnical design, developing and implementing numerous innovative numerical tools and conducting lab and in situ experimental activities for the seismic assessment of structures. He received several scientific awards and delivered invited lectures at a number of scientific events, having published a large number of technical and scientific papers and reports and regularly lecturing at different international universities. He is a member of the Executive

Committee of the EFEHR Consortium and currently also serves as Technical Secretary of CEN/TC 250/SC 8, strongly contributing to the preparation of the next generation of European seismic design regulations (Eurocode 8).
