

António Cabaço

António Cabaço is a Senior Researcher at LNEC and Head of the Building Quality, Economics and Management Unit. He has a degree in Civil Engineering from the Instituto Superior Técnico, University of Lisbon (1993), and a PhD in Civil Engineering from the same institute (2011). He has focused his activity on advising public works owners on the execution of construction projects. He has taken part in technical committees and working groups to draw up proposals for revising construction legislation. He has disseminated the results of his work in publications, lectures, communications and courses. His main field of research is construction economics and management, particularly in the areas of construction work costs, contract price revision, public procurement and physical and financial monitoring of the execution of construction projects, and construction quality. In these areas, he has carried out technical expertise in legal proceedings. He has taught on undergraduate and master's programmes at Lusófona University (2012-2023) and Nova University (2017-2025).
