

Marta Vicente

Marta Vicente is an architect engaged in research projects and studies in the fields of architecture, engineering, and social sciences. She holds a Bachelor's degree in Architectural Studies (2013) and a Master's degree in Architecture (2016), both from the Faculty of Architecture of the University of Lisbon. In 2016, she began her professional career as an intern at the National Laboratory for Civil Engineering (LNEC), where she has since been collaborating with the Urban and Territorial Studies Unit of the Buildings Department. She has participated in both national and international research projects and has contributed to a range of studies. Her work focuses on (i) the organization and functioning of the built environment, (ii) urban regeneration and the rehabilitation of cities and buildings, (iii) safety in the built environment, (iv) the production and management of the built environment, and (v) social perception, attitudes, and behaviours towards risk. She is currently enrolled in the doctoral programme Architecture of Contemporary Metropolitan Territories at ISCTE-IUL, where she is developing her PhD research on the rehabilitation of historic buildings, supported by funding from FCT and LNEC.
