

## Pedro Andrade

Pedro Andrade is an expert in the fields of steel and modular construction. He gained his expertise while pursuing his doctoral studies in Sweden, during which he actively participated in various research endeavors related to these domains.

In industry he made significant contributions as a structural engineer in over 20 modular buildings, having developed various building systems.

Currently, Pedro holds the position of Chief Technology Officer (CTO) at Blufab and Innovation Manager at Casais Group. In this role, he leads the charge in integrating digital and automation solutions, with a strong emphasis on artificial intelligence, within the industrialized construction

sector.
